Subject: Microsoft Settlement

Dear fellow American,

I am writing this to voice my absolute amazement that my government is planning to settle this lawsuit with Microsoft. I have been a member of the community affected by Microsoft's draconian practices for 15 years. I have watched them illegally destroy technologies which would have benefited myself and millions of others. The most notable of these being the Netscape web browser (believe me it is dead. It would take an act of God to bring its market share back to where it was when what mattered was quality). If you need a simple current example just examine the way they are hamstringing their "Windows Media Player" into Windows XP in such a way that makes it highly cumbersome to use any of their competitors' products. Thank you for your attention.

Attentively;

Marc Allen
